

Alessandro Gifford, PhD
Computational Neuroscientist
Berlin, Germany

EDUCATION

- | | |
|-------------|---|
| 2020 - 2025 | PhD in Computational Visual Neuroscience (summa cum laude)
Freie Universität Berlin, Berlin, Germany
Advisor: Radoslaw M. Cichy
Thesis: <i>In silico neuroscience: an emerging paradigm for brain discovery</i> |
| 2018 - 2019 | MSc Thesis Research Internship
Freie Universität Berlin, Berlin, Germany
Advisors: Daniel Kaiser, Radoslaw M. Cichy |
| 2017 - 2019 | MSc Cognitive Neuroscience (grade: 110/110 with honour)
CIMeC, Rovereto, Italy
Advisors: Daniel Kaiser, Radoslaw M. Cichy, Scott L. Fairhall
Thesis: <i>Implicit neural coding of natural scene structure</i> |
| 2016 - 2017 | BA Philosophy Exchange Student
University of John Paul II, Kraków, Poland |
| 2014 - 2017 | BA Philosophy (grade: 110/110 with honour)
University of Trento, Trento, Italy
Advisors: Carlo Brentari, Paola Giacomoni
Thesis: <i>Nature, nurture, and reason as determinants of human behavior</i> |

RESEARCH EXPERIENCE

- | | |
|-------------|---|
| 2025 - now | Postdoctoral Researcher
Freie Universität Berlin, Berlin, Germany
Advisor: Radoslaw M. Cichy |
| 2024 - 2025 | Organization of the Algonauts Project 2025 Challenge
University of Montreal, Montreal, Canada
Advisors: Lune Bellec, Radoslaw M. Cichy |
| 2022 - 2023 | Organization of the Algonauts Project 2023 Challenge
University of Minnesota, Minneapolis, MN, USA
Advisors: Kendrick Kay, Radoslaw M. Cichy |

2021 **Research Project in Brain Computer Interface Technology**
Charité - Universitätsmedizin Berlin, Berlin, Germany
Advisor: Surjo Soekadar

MEMBERSHIPS & AFFILIATIONS

2021 - 2025 Bernstein Center for Computational Neuroscience, Berlin, Germany
2020 - 2025 Einstein Center for Neurosciences, Berlin, Germany

FUNDING & AWARDS

2026 Prize for Best Teaching in Psychology
2023 National Eye Institute Early Career Scientist Travel Grant (VSS conference)
2020 - 2023 Einstein Center for Neurosciences PhD scholarship

PEER-REVIEWED ARTICLES

2026 **Gifford AT**, Cichy RM, Naselaris T, Kay K. 2026. A 7T fMRI dataset of synthetic images for out-of-distribution modeling of vision. *Nature Communications*.

Sartzetaki C, Zonneveld AW, Oyarzo P, **Gifford AT**, Cichy RM, Mettes P, Groen IIA. 2026. The Human Brain as a Dynamic Mixture of Expert Models in Video Understanding. *International Conference on Learning Representations*.

2025 **Gifford AT**, Jastrzębowska MA, Singer JJD, Cichy RM. 2025. In silico discovery of representational relationships across visual cortex. *Nature Human Behavior*.

Rong B, **Gifford AT**, Düzel E, Cichy RM. 2025. The time course of visuo-semantic representations in the human brain is captured by combining vision and language models. *eLife*.

Guo M, Choksi B, Sadiya S, **Gifford AT**, Vilas MG, Radoslaw Cichy RM, Roig G. 2025. Limited but consistent gains in adversarial robustness by co-training object recognition models with human EEG. *European Conference on Computer Vision*.

2024 Lahner B, Dwivedi K, Iamshchinina P, Graumann M, Lascelles A, Roig G, **Gifford AT**, Pan B, Jin S, Ratan Murty NA, Kay K, Oliva A, Cichy RM. 2024. Modeling short visual events through the BOLD moments video fMRI dataset and metadata. *Nature Communications*.

2022 **Gifford AT**, Dwivedi K, Roig G, Cichy RM. 2022. A large and rich EEG dataset for modeling human visual object recognition. *NeuroImage*.

PREPRINTS

2026 **Gifford AT**, Bersch D, Janini D, Roig G, Cichy RM. 2026. A resource of encoding models for in silico neuroscience. *CCN Extended Abstract*.

2025 **Gifford AT**, Bersch D, St-Laurent M, Pinsard B, Boyle J, Bellec L, Oliva A, Roig G, Cichy RM. 2025. The Algonauts Project 2025 Challenge: How the Human Brain Makes Sense of Multimodal Movies. *arXiv preprint*.

2023 **Gifford AT**, Lahner B, Saba-Sadiya S, Vilas MG, Lascelles A, Oliva A, Kay K, Roig G, Cichy RM. 2023. The Algonauts Project 2023 Challenge: How the Human Brain Makes Sense of Natural Scenes. *arXiv preprint*.

ACADEMIC PRESENTATIONS

2026	Poster, Neuro-AI-Talks (NEAT) conference, Osnabrück, Germany. September 2026. Title: A resource of encoding models for in silico neuroscience. [link] Keynote, Cognitive Computational Neuroscience (CCN) conference, New York City, NY, USA. August 2026. Title: In silico neuroscience: an emerging paradigm for brain discovery. [link] Tutorial, Cognitive Computational Neuroscience (CCN) conference, New York City, NY, USA. August 2026. Title: In silico neuroscience: an emerging paradigm for brain discovery. [link] Poster, Cognitive Computational Neuroscience (CCN) conference, New York City, NY, USA. August 2026. Title: A resource of encoding models for in silico neuroscience. [link] Talk, Hebart Lab, Justus-Liebig-Universität Gießen, Gießen, Germany. July 2026. Title: In silico neuroscience: an emerging paradigm for brain discovery. [link] Talk, Vision Sciences Society (VSS) conference, St. Pete Beach, FL, USA. May 2026. Title: A resource of neural encoding models for in silico visual neuroscience. [link] Satellite, Vision Sciences Society (VSS) conference, St. Pete Beach, FL, USA. May 2026. Title: re:vision: A community-driven replication initiative for condition-rich neuroscience of visually-presented stimuli. [link] Poster, Computational and Systems Neuroscience (COSYNE) conference, Lisbon, Portugal. March 2026. Title: Catalyzing in silico neuroscience with a toolkit of accurate encoding models of the brain. [link]
2025	Talk, Bonner Lab, Johns Hopkins University, Baltimore, MD, USA. November 2025. Title: In silico neuroscience: an emerging paradigm for brain discovery. [link] Talk, Computational Visual Neuroscience Laboratory, University of Minnesota, Twin Cities, MN, USA. October 2025. Title: In silico neuroscience: an emerging paradigm for brain discovery. [link]

Talk, SISSA, Trieste, Italy. October 2025. Title: In silico neuroscience: an emerging paradigm for brain discovery. [[link](#)]

Talk, Kietzmann Lab, University of Osnabrück, Osnabrück, Germany. September 2025. Title: In silico neuroscience: an emerging paradigm for brain discovery. [[link](#)]

Talk, Cognitive Computational Neuroscience (CCN) conference, Amsterdam, Netherlands. August 2025. Title: A 7T fMRI dataset of synthetic images for out-of-distribution modeling of vision. [[link](#)]

Talk, Cognitive Computational Neuroscience (CCN) conference, Amsterdam, Netherlands. August 2025. Title: The Algonauts Project 2025 Challenge: How the Human Brain Makes Sense of a World in Motion. [[link](#)]

Poster, Cognitive Computational Neuroscience (CCN) conference, Amsterdam, Netherlands. August 2025. Title: Catalyzing in silico neuroscience with a toolkit of accurate encoding models of the brain. [[link](#)]

Poster, Cognitive Computational Neuroscience (CCN) conference, Amsterdam, Netherlands. August 2025. Title: A 7T fMRI dataset of synthetic images for out-of-distribution modeling of vision. [[link](#)]

Talk, Enigma Journal Club, Stanford University, Stanford, CA, USA. March 2025. Title: In silico neuroscience. [[link](#)]

2024

Talk, Charest Lab, Université de Montréal, Montréal, Canada. November 2024. [[link](#)]

Talk, Computational Perception & Cognition Lab, MIT, Boston, MA, USA. October 2024. [[link](#)]

Talk, Montreal AI and Neuroscience (MAIN) conference, Montréal, Canada. October 2024. Title: Experimentation on in silico neural responses from encoding models. [[link](#)]

Tutorial, Montreal AI and Neuroscience (MAIN) conference, Montréal, Canada. October 2024. Title: Experimentation on in silico neural responses from encoding models. [[link](#)]

Talk, Freie Universität Berlin, Berlin, Germany. October 2024. Title: Experimentation on in silico neural responses from encoding models. [[link](#)]

Talk, Neuro-AI-Talks (NEAT) conference, Osnabrück, Germany. September 2024. Title: Experimentation on in-silico neural responses from encoding models. [[link](#)]

Poster, Neuro-AI-Talks (NEAT) conference, Osnabrück, Germany. September 2024. Title: Investigating representational relationships across visual cortex using relational neural control. [\[link\]](#)

Talk, Ponce Lab, Harvard, Boston, MA, USA. August 2024. [\[link\]](#)

Poster, Cognitive Computational Neuroscience (CCN) conference, Boston, MA, USA. August 2024. Title: Relational neural control: a method for investigating functional relationships across the brain. [\[link\]](#)

Symposium, Vision Sciences Society (VSS) conference, St. Pete Beach, FL, USA. May 2024. Large-scale visual neural datasets: where do we go from here?. [\[link\]](#)

Poster, Vision Sciences Society (VSS) conference, St. Pete Beach, FL, USA. May 2024. Title: Disentangling the unique contribution of human retinotopic regions using neural control. [\[link\]](#)

2023 **Poster**, Neuro-AI-talks (NEAT), Osnabrück, DE. September 2023. Title: A large and rich EEG dataset for modeling human visual object recognition. [\[link\]](#)

Talk, Cognitive Computational Neuroscience (CCN) conference, Oxford, UK. August 2023. Title: The Algonauts Project 2023 Challenge: How the Human Brain Makes Sense of Natural Scenes. [\[link\]](#)

Hackathon, Cognitive Computational Neuroscience (CCN) conference, Oxford, UK. August 2023. Title: The Algonauts Project 2023 Challenge: How the Human Brain Makes Sense of Natural Scenes. [\[link\]](#)

Talk, Vision Sciences Society (VSS) conference, St. Pete Beach, FL, USA. May 2023. Title: A large and rich EEG dataset for modeling human visual object recognition. [\[link\]](#)

2022 **Talk**, Perception Lunch, University of Minnesota, Twin Cities, MN, USA. November 2022. Title: Resolving the neural algorithm of visual perception. [\[link\]](#)

Poster, Cognitive Computational Neuroscience (CCN) conference, San Francisco, CA, USA. August 2022. Title: A large and rich EEG dataset for modeling human visual object recognition. [\[link\]](#)

ACADEMIC PEER REVIEWING

2026	Scientific Reports, CCN Proceedings, Scientific Data, Nature Human Behavior, Communications Biology, NeurIPS Workshop
2025	CCN Proceedings, Imaging Neuroscience, Nature Human Behavior, NeurIPS Workshop, npj Digital Medicine
2024	Nature Communications
2023	Cerebral Cortex, NeuroImage
2022	NeuroImage

TEACHING EXPERIENCE

2026	EEG data collection and analysis (Freie Universität Berlin)
2025	Introduction to programming (Freie Universität Berlin)
2025	Advanced fMRI data analysis (Freie Universität Berlin)

MENTORED STUDENTS

2025 - 2026	Ling Cong Kong (PhD project)
2025 - 2026	Jeffrey Katabo (Pre-Doc Internship)
2024 - 2025	Lorenzo Stroppa (MSc Internship)
2024	Andreea-Maria Gui (Pre-Doc Internship)
2023	Todd Hagen (MSc Internship)
2022	Furkan Özkan Hüseyincan (Internship)
2021	Andrei Kitaitsev (MSc Thesis)
